

AMRIT DHAMI

ENTRY LEVEL DATA SCIENTIST WITH AI,ML
& DEEP LEARNING

+977 9848737606

amrit99dhami@gmail.com

Bedkot,7 Gaugi, Kanchanpur-Nepal

DIGITAL PRESENCE

GitHub: github.com/amritdhami123

LinkedIn: linkedin.com/in/amritdhami123

PROFESSIONAL SUMMARY

Motivated Machine Learning and Data Science enthusiast with hands-on experience developing predictive models and recommendation systems using Python. Proficient in data analysis, machine learning algorithms, and deep learning with demonstrated expertise in Pandas, Numpy, Seaborn, Scikit-learn, TensorFlow, and PyTorch.

EDUCATION

- Swit Education, Sanepa, 2, Lalitpur, Nepal
Data Science & AI | [9/25/2025 - 12/03/2026]
- Morning Glory H.S.S., Mahendranagar, Kanchanpur
10+2 in Science | [2012 - 2014]
- Janjyoti Multiple Campus, Mahendranagar, Kanchanpur
bachelor degree in arts | [2015 - 2019]

EXPERIENCE

- Customer Care Representative | World Shine Solar (International BPO)
Gurugram, Haryana, India | [2017 – 2018]
- Customer Care Representative / Supervisor | NIRAMB Solution (International BPO) | Kirtinagar, New Delhi, India | [2018 – 2020]
- Sales AssociateTANGLO (Ice-Cream Parlor) | Gurugram, Haryana, India | [2020 – 2021]

SKILLS

- **Languages & Databases:** Python, SQL, MySQL
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Keras, PyTorch, TensorFlow and NLTK.
- **Machine Learning:** Regression, Classification, Clustering, SVM, CNN and RNN.
- **NLP Techniques:** Tokenization, Stemming & Lemmatization, Stopwords, Vectorization (TF-IDF/BoW)
- **Tools:** Jupyter Notebook, VS Code, Excel, Google Sheets, Git/GitHub

SOFT SKILLS

- | | | |
|-------------------|---------------------|--------------------|
| • Negotiation | • Leadership | • Time-management |
| • Communication | • Customer Service | • Active Listening |
| • Tech Savvy | • Analytical | • Adaptability |
| • Business Acumen | • Critical Thinking | • Resourcefulness |

PROJECTS

1) [End-to-End Mobile Price Prediction System | Python, Scikit-Learn & Regression]

[Feb/30/2026 - Mar/10/2026]

- Developed an end-to-end Mobile Price Prediction model using Python and Advanced Regression to analyze hardware specs and brand value.
- Engineered data pipelines to process features like RAM, Storage, and Camera Quality, delivering real-time estimates within a $\pm \$50$ margin.
- Implemented feature selection and data preprocessing techniques to handle 10+ variables, ensuring high-precision valuations for retailers and consumers.
- Optimized model performance to provide instantaneous valuations, improving market transparency and pricing accuracy in the smartphone industry.

2) [Netflix Churn Prediction Model | LightGBM, Machine Learning & Behavioral Analytics]

[Feb/12/2026 - Mar/5/2026]

- **Model Engineering:** Developed a high-performance churn prediction model using LightGBM to identify at-risk subscribers based on viewing patterns, behavioral analytics, and demographics.
- **Technical Performance:** Achieved 90.52% accuracy and a 0.922 F1-score, significantly outperforming Logistic Regression through advanced feature engineering and model tuning.
- **Data-Driven Insights:** Analyzed user engagement metrics and subscription history to deliver actionable insights, enabling the implementation of proactive customer retention strategies.
- **Business Impact:** Improved platform loyalty and subscriber satisfaction by providing data-backed churn risk assessments to guide targeted marketing and retention efforts.

3) [Movie Recommendation System | Python, Machine Learning, Streamlit]

[Mar/20/2026 - Mar/30/2026]

- **Algorithm Development:** Built a content-based recommendation engine using Cosine Similarity and TF-IDF, achieving 85%+ accuracy across 45,000+ movie records.
- **Full-Stack Implementation:** Developed an interactive Streamlit web application integrated with TMDB API for real-time movie metadata and poster retrieval.
- **Performance Optimization:** Engineered data pipelines using Pandas and NumPy, implementing caching to reduce API latency by 60% and response times to under 3s.
- **User Impact:** Improved content discovery efficiency by reducing average movie selection time from 15 minutes to under 5 minutes through intuitive filtering.

4) [Sign Language Recognition System | VGG16, CNN & Image Classification]

[Mar/5/2026 - Mar/10/2026]

5) [Smart Job Recommendation & Resume Analyzer System | Python,NLP, Machine Learning,Streamlit, Docker, FastAPI, PostgreSQL]

[Apr/7/2026 - Apr/27/2026]

- **AI-Driven Analysis:** Developed an end to end, NLP-powered system to match resumes with job descriptions, providing automated match scores and personalized role recommendations.
- **Technical Stack:** Leveraged Python, Scikit-learn, and SpaCy/NLTK to implement TF-IDF and Cosine Similarity for high-accuracy skill extraction and text matching.
- **Interactive Interface:** Built and deployed a modular web application using Streamlit, featuring real-time PDF parsing and an automated model training pipeline.
- **Data Insights:** Engineered an end-to-end ML pipeline that identifies critical skill gaps, helping candidates make data-driven decisions to improve employability.

6) WhatsApp Chat Analysis | Python, Heroku

TRAINING & WORKSHOP

- Advance Excel course (3 Months) | Infonet Computer Education | Munirka, New Delhi, India | [13-08-2019]
- Hardware & Networking Course (6 Months) | Infonet Computer Education | Munirka, New Delhi, India | [06-01-2019]
- Computer Operator (6 Months) | Lions Computer | Mahendranagar, Kanchanpur, Nepal | [2018]

ACHIEVEMENTS & RECOGNITION

Python 101 For Data Science by IBM	- [July/19/2025]
HTML in Hindi – Great Learning Academy	- [June 2023]
